

## Supplier Environmental Performance

At JP Sá Couto, S.A., whose trading name is jp.ik, we are strengthening our position and commitment to sustainable development, working towards a fairer, safer and more sustainable future for the generations of today and tomorrow.

In 2024, we are disclosing for the first time aggregated data on the environmental performance of our suppliers for the following environmental aspects:

- Energy use
- Scope 1 and Scope 2 greenhouse gas emissions
- Water use

The suppliers in scope represent about 55% of directly contracted suppliers, based on annual spend for the FY2023, from January 1<sup>st</sup> 2023 to December 31<sup>st</sup> 2023.

The data includes relevant supplier operations at company level and was collected and aggregated through the internal supplier communication procedure.

### Aggregate Supplier Data

Key Performance Indicator	2020	2021	2022
Energy use (GJ)	38 374 791,431	41 956 986,238	39 443 799,953
Scope 1&2 GHG emissions (mtCO <sub>2</sub> e)	1 396 855,282	1 567 656,498	1 562 653,097
Water use (ML)	52 240 141,900	54 132 884,610	41 262 208,370
